SUMMARY

Full-stack developer and AI/ML engineer with hands-on experience building GenAI applications, RAG pipelines, and scalable web platforms. Proficient in Python, JavaScript, LangChain, React, Node.js, Docker, and AWS. Delivers measurable impact through performance optimization, clean architecture, and production-grade engineering across distributed systems.

EXPERIENCE

ASSANJ

May 2026 – Present

Full Stack Developer

Remote

- Developing and optimizing **full-stack web applications** using **React, Node.js, and REST APIs**; collaborating in an agile, industry-oriented environment to ship features across the complete development lifecycle
- Implementing **scalable backend logic**, responsive UI components, and streamlined **CI/CD workflows** for real-world client-facing products; contributing to code reviews and architectural decisions

Analytx4t

Dec 2025 – Feb 2026

Generative AI Intern

Remote

- Built production GenAI applications using **LLMs, LangChain, and Python**; delivered **8 RAG pipelines** for document intelligence with vector search and tool-augmented agents
- Reduced inference latency by **40%** via chunking and embedding tuning; evaluated **5+ prompt strategies**, boosting RAG faithfulness scores by **22%** on internal benchmarks

PROJECTS

UniTalks (*Under Development*) | *Node.js, Socket.IO, React, Redis, WebRTC, Docker, AWS EC2, Nginx*

- Building a **full-stack anonymous real-time chat platform** at [unitalks.in](#); integrating WebRTC voice/video, Redis session state, and Nginx reverse proxy on AWS EC2 to support **1,000+ concurrent connections**
- Scaling horizontally via Redis Pub/Sub; containerized with Docker Compose and CI/CD via GitHub Actions, **reducing deployment time by 75%**; validated at **150+ concurrent users** under load testing

Baansinfra (*at ASSANJ*) | *React, Node.js, Supabase*

- Leading full-stack development of [baansinfra.com](#)—a project portfolio and lead-generation platform for a bamboo construction and architecture firm spanning residential, hospitality, and institutional builds
- Architected the backend with **Supabase** (PostgreSQL, Auth) for enquiry management and dynamic project categorization; built a responsive React frontend integrated with Node.js services

AuraHonda | *React, Node.js, Express, MongoDB, Cloudinary, AWS S3*

- Sole developer of [aurahonda.com](#)—a full-stack automotive dealership platform with inventory management, lead capture, and an integrated enquiry system for showroom operations
- Built a CMS-style admin dashboard with Cloudinary media pipelines and a secure REST API with RBAC, server-side filtering, and zero-downtime CI/CD deployments on AWS

EDUCATION

Vellore Institute of Technology

2024 – 2028

B.Tech Computer Science – Specialization in Data Science | *CGPA: 8.2*

Chennai, India

- Impact:** Organized OpenHack 2025 (130+ participants, **\$5K+ prizes**); Event Coordinator at IE(I); Attended AI/ML workshops along with **200+ students** at IIT Madras and NIT Trichy; Programme Management Head at [Y-SoC](#), overseeing **500+ participants** across 5 cohorts

Central Academy, Lucknow

Class 12 CBSE – PCM: 87% | *Class 10 CBSE – Overall: 93.6%*

SKILLS

Languages : C, C++, Java, Python, JavaScript (React.js, Node.js), TypeScript, HTML/CSS, Dart (Flutter), SQL

AI & ML : TensorFlow, PyTorch, Scikit-learn, LangChain, LangGraph, MLflow, Hugging Face, NumPy, Pandas, ChromaDB, FAISS

Web & Cloud : REST APIs, FastAPI, Next.js, Docker, AWS EC2, Redis, Supabase, PostgreSQL, Nginx, Vercel, Netlify, Render

Tools : Git, GitHub Actions, Jira, Figma, Power BI, Tableau, Postman, Linux

Patents : "System and Method for Stress and Pain Detection Using Multi-Scale Transformer-Based Neural Networks" – Application No. 202641065281 (Published)

Certifications : MongoDB Building RAG Apps (2025) | Google Agentic AI Day (2025) | Microsoft Agentic AI Workshop (2025)
